

LOV ELECTRIC & GAS FRYERS

The Henny Penny LOV fryer was designed from the ground up to offer McDonald's operators a way to reduce the actual cost of frying. After thousands of installations, we've also learned how much operators like some of the little things you can only get with the Henny Penny LOV electric or gas fryers.

- 40% lower oil capacity than regular vats (15 qts/30 lbs)
- Sensor-activated automatic top-off feature to replenish oil
- One-touch filtration on the fly in fewer than 4 minutes
- Energy saver mode allows automatic energy savings when not cooking
- Works with bulk oil systems

Easy Operation

- A** QUICK FILTER PROCESS: Filter individual vats on the fly in fewer than 4 minutes with easy one-button request/confirm.
- B** AUTO TOP-OFF: Sensor-activated automatic top-off feature replenishes oil from J-I-B.
- C** ONE-PIECE HANGER: Heavy-duty full-length basket hanger is easy to use and built for abuse. One-piece 0.105 in. (2.7 mm) plate steel hanger runs the length of the fryer. Removes in seconds. No tools, parts or fasteners to lose.
- D** LESS MESS: Fryer deck slopes in toward vats to keep drips from reaching controls and floor. Makes cleanup easier and floors less slippery.
- E** SEAMLESS LANGUAGE CHANGE: Only two key strokes to change language back and forth on control display. Great productivity enhancement for mixed-language crews.
- F** EASY-ACCESS PAN: Compact, easy-to-manuever filter pan on four casters. Rolls out smoothly for normal cleaning, filter media changeout and oil disposal.
- G** COVER STORAGE (ELECTRIC MODEL ONLY): Convenient onboard storage for night covers with 3- and 4-vat electric models. Set covers inside the fryer on rack in the open area under left-side vats.
- H** USER-FRIENDLY CONTROLS: Operator-friendly controls feature easy-to-read display, larger text size and larger, more separated touch keys.

Reliability

- I** SIMPLE CONNECTIONS: Patented selector valve system eliminates all solenoid valves, making 21 fewer plumbing connections on a 3-well unit.
- J** NO-HASSLE SERVICING: Engineered for ease of serviceability with clean, well-organized component area and easily accessible components. Parts are easy to change out, common ones require no tools.
- K** QUICK FIX: Easy troubleshooting with error codes in HP Info Mode right from the control. Most diagnosis can be done conveniently from front of unit.
- L** SMOOTH CONTROL SURFACE: Sealed menu cards preserve smooth, protective control surface. Cards slide in from behind control panel leaving a smooth, clean surface without stickers or pockets that collect dirt, peel off or wear away.
- M** EVERYTHING WITHIN REACH (GAS MODEL ONLY): Vertical gas line quick connect conveniently located near front of unit inside left front door.
